CORE EXPERTISE

- C# and Unity
- 2D / 3D gameplay systems
- Mobile game optimization
- Memory, FPS, crash and ANR analysis
- Android and iOS delivery
- Unity UI and animation
- Spine and Shader Graph
- Unity Editor tooling
- Playable Ads with Luna
- Asynchronous programming (async / await, coroutines)
- Git workflows and code review
- Azure DevOps and CI / CD pipelines
- Agile / Scrum workflows

Ngo Bao Long

Unity Developer

Unity Developer shipping 2D and 3D mobile games since 2021, across hyper-casual, hybrid-casual and puzzle genres. Experienced in gameplay development, SDK integration, Android and iOS releases, performance optimization, codebase modularization and developer mentoring. Focused on building maintainable systems and smooth player experiences across a wide range of mobile devices.

EXPERIENCE

Unity Developer

Jun 2026 - Present

Jurrac Studio

- Developing puzzle games for mobile.
- Training and configuring AI coding agents to support the development team.
- Reviewing agent-generated code for maintainability and fixing it manually where needed.
- Building reusable frameworks so generated code follows consistent, maintainable patterns.

Unity Developer / Mentor / Sub-Lead

Aug 2022 - May 2026

Hapiga Studio

Developer, Mentor and Sub-Lead | 2024 - 2026

- Profiled and optimized FPS, memory usage, crashes and ANRs to improve stability and gameplay quality on mobile devices.
- Refactored production code into reusable modules, improving maintainability and development efficiency across projects.
- Mentored junior developers through code reviews, debugging support and technical guidance.
- Developed playable ads with Luna and collaborated with the user-acquisition team on creative production.
- Evaluated and applied AI-assisted workflows to accelerate development while maintaining engineering review and quality control.

Unity Developer | 2022 - 2024

- Developed gameplay and supporting systems for commercial 2D and 3D mobile titles across hyper-casual, hybrid-casual and puzzle genres.
- Integrated monetization and analytics SDKs, including ad mediation, Firebase and Adjust.
- Diagnosed build and release issues and supported reliable publishing workflows for Android and iOS.
- Collaborated with artists, designers and product stakeholders to turn gameplay requirements into production-ready features.

Unity Developer Intern

May 2021 - Aug 2021

PocketSized Team

- Developed gameplay features for 2D hyper-casual and casual mobile games using Unity and C#.
- Contributed to shipped titles including Bandit Hero, Tuber Rescue and Tower Quest: Epic Heroes.

COMPLETE SHIPPED PROJECT LIST

- AI coding agent training and setup
- AI-generated code review and refactoring
- Reusable framework design

SDKS & SERVICES

- Firebase
- Adjust
- Ad mediation SDKs
- Mobile analytics
